Notes:

Finn's internet crashes lately have caused me to take some extrapolations data wise, but they all seem to be positive. Finn pulling off a near 4.4k average in the first 4 hours of a Thursday 8pm stream is quite impressive stuff! Right before the stream crash his numbers were hitting 5k as well so it could have been even better, maybe settling at around 4.1k to 4.2k for the whole 7.5 hours? Finn gave plenty of warning for this stream (about 5 hours beforehand) so that probably helped a lot, as well as the 8pm time helping Americans.
